

ASX/Media Release

bodycur and MEDEC will co-operate in Germany

06 July 2005 – Perth based health care equipment company MEDEC Limited [ASX: MAA] has signed a Heads of Agreement with bodycur of Germany to promote MEDEC's Health Centre System in Germany. bodycur operates 33 Health Centres in Germany on a franchise basis, offering a unique concept of health, diet and slimming advice. In addition to providing a healthy, nutritional and well tasting diet designed by one of Germany's well known chefs, some 25 top German restaurants offer bodycur's nutrition as part of their menu, allowing bodycur clients to also eat out in style while maintaining their diet objectives.

In May 2005, MEDEC has launched its high tech computer supported Biograph metabolic assessment device, the Calori-Fit, which is ideally suited to give personalised advice regarding the type and balance of food to eat and in what quantity. The Biograph Calori-Fit provides information of how different people metabolise the food which they eat into energy and how this energy is provided for the challenges of life. This is of interest to every person but particularly for people who want to lose weight and improve body texture at the same time.

MEDEC has developed its MEDEC Health Centre concept, which uses the Biograph to provide information on the type of food to eat or not to eat. The MEDEC Health Centre also supplies MEDEC's space age bio-stimulation and detoxification devices. MEDEC clients benefit from a higher metabolic rate, better fat burning capabilities giving more energy, better self healing and more quality of life.

bodycur and MEDEC have now finalised an agreement, under which bodycur will adopt the MEDEC Health Centre concept within its franchise system. bodycur plans to introduce the MEDEC Health Centre concept to its 33 franchisees and eventually to its 30,000 clients. By using the MEDEC technology, bodycur becomes the first German nutritional company to use a diagnostic instrument in the giving of personal nutritional advice.

The project will be rolled out stages during July – November 2005. bodycur and MEDEC will establish 2 training centres in Germany and further franchisees will be supplied and trained during the 4th quarter of the 2005 year. Hardware leasing and software licensing will be provided by the co-operation partners. MEDEC has organised the product supply and after sales service via its German subsidiary.

"A professional and sustainable franchise concept makes bodycur an ideal co-operation partner for the German market," said Mr Josef Plattner, CEO of MEDEC Ltd. "bodycur and MEDEC are a good match in nutrition based health advice with MEDEC providing bodycur with scientific technology and bodycur having developed a well managed Franchise Marketing system" Mr Plattner said.

With this project, MEDEC's order book for the new Biograph Calori-Fit device has increased to 150 units to be supplied within the next 4 months. Further negotiations are being held with German companies to introduce the MEDEC technology to the German fitness industry, where the Biograph Calori-Fit can be used to design an individual training program to maximise fat burning by assessment of the individual's metabolic rate and training progress.
